Account: a group of entities (like users) that share access to certain functionality, and data (like documents and other objects) that the account owns. Release name: a description of the product for use by humans License: The legal license of a computer program. A license is only required to be accepted by the user, not by the program itself, but having an acceptable license makes it easier to make changes and upgrades to the program. Also, the license document gives the user permission to use the software in specific ways. Keygen: An identifier or abbreviation for a computer program that allows you to change some aspect of that program. This typically means allowing you to change the program's settings, and is usually used for programs that are meant to be customized by the user.

Autocad: A design program, first released in 1987 by Autodesk. It is capable of creating drawings that are used by architects and civil engineers to create detailed blueprints for construction of buildings and other large-scale structures. The program is used to create floor plans, elevation plans, and three-dimensional models. It is intended to be used in combination with other programs such as Inventor, 3ds Max, and others to produce a complete design.
