

---

Questo libro è depositato e soggetto a protezione di diritto d'autore. Codice di registrazione mirc 7.29 13.. A: I don't think it is as simple as finding the starting point of each word, though I'm not sure why you think that's the case. The first word is always the name (in bold, above) of the program. The second word is always either "Source Code" or "Engine". The third word is always "Source" and the fourth word is always "Code". (Incidentally, the "code" word is always second and the "Source" word is always third.) This is the first line of the program, after the name: 55cdc1ed1c
